

List of Measures

Behavioral Healthcare Performance Measurement System™

The Joint Commission HBIPS Core Measure Set (open October 2008)

Screening for Risk of Violence to Self, Risk of Violence to Others, Substance Use, Psychological Trauma History, and Patient Strengths: Percent of discharged clients who were screened for all of the following: risk of violence to self, risk of violence to others, substance use, history of psychological trauma, and patient strengths by the 3rd day post admission.

Physical Restraint Hours: Number of hours clients spent in restraint for all inpatient hours.

Seclusion Hours: Number of hours clients spent in seclusion for all inpatient hours.

Discharged on Multiple Antipsychotic Medications: Percent of clients discharged from a facility on two or more antipsychotic medications of those discharged on at least one antipsychotic medication.

Discharged on Multiple Antipsychotic Medications with Appropriate Justification: Percent of clients discharged from a facility on two or more antipsychotic medications that had an appropriate justification documented. Appropriate justification includes: history of 3 or more failed trials of mono-therapy, plan for tapering to mono-therapy or cross-taper in progress, and augmentation of Clozapine.

Continuing Care Plans Created: Percent of clients discharged from a facility with a continuing care plan created that includes all of the following: reason for hospitalization, discharge medications, discharge diagnoses, and next level of care recommendations.

Continuing Care Plans Transmitted to Next Level of Care: Percent of clients discharged from a facility with a continuing care plan created that includes reason for hospitalization, discharge medications, discharge diagnoses, and next level of care recommendations and was transmitted to the next level of care provider by the 5th day post discharge.

NRI Non-core Measures acceptable to the Joint Commission for the ORYX® requirement

30 Day Readmission (Discharge Cohort): Percent of discharges from the facility that returned within 30 days of a discharge of the same client from the same facility.

Brief Psychiatric Rating Scale (BPRS): Mean percent change between Admission and Discharge ratings of total symptom severity using the Brief Psychiatric Rating Scale.

Client Injury Rate: Number of client injury events that occurred for every 1000 inpatient days.

Concurrent Antipsychotic Treatment (CAT): Proportion of clients receiving concurrent antipsychotic treatment at the end of the episode.

Inpatient Consumer Survey – Dignity: Percent of clients at discharge or at annual review who respond positively to the Client Perception of Dignity domain on the NRI/MHSIP Inpatient Consumer Survey. (4 questions)

USING DATA, CHANGING PRACTICE™

Inpatient Consumer Survey – Outcomes: Percent of clients at discharge or at annual review who respond positively to the Client Perception of Outcome of Care domain on the NRI/MHSIP Inpatient Consumer Survey. (4 questions)

Inpatient Consumer Survey – Participation: Percent of clients at discharge or at annual review who respond positively to the Client Perception of Participation in Treatment domain on the NRI/MHSIP Inpatient Consumer Survey. (3 questions)

Inpatient Consumer Survey – Rights: Percent of clients at discharge or at annual review who respond positively to the Client Perception of Rights domain on the NRI/MHSIP Inpatient Consumer Survey. (3 questions)

Elopement Rate: Number of elopements that occurred for every 1000 inpatient days.

Global Assessment of Functioning (GAF): Global Assessment of Functioning: Mean % change between Admission and Discharge rating of overall functioning.

Mean New Generation Antipsychotic Dose (Mean AP Dose): Mean dose of new generations antipsychotic medications on the last day of the reporting period or the last day of the episode (measured in chlorpromazine equivalents).

Mean Number of Scheduled Medications (Mean Meds): Mean number of scheduled medications on the last day of the reporting period or the last day of the episode. Note that in determining the number of medications for each client, what is counted is the number of distinct drugs ordered (i.e.; the number of distinct active ingredients) for each client, which may be different from the number of medication orders.

Medication Changes Near Discharge (Med Chng): Percent of episodes with changes in scheduled psychotropic medication regimen during the last three days of the episode.

Medication Error Rate: Number of medication error events that occurred for every 100 episodes of care (duplicated client count).

New Generation Antipsychotic Use (NGAP): Percent of all clients who received any antipsychotic who received new antipsychotic medications.

Percent of Clients Restrained: Percent of unique clients who were restrained at least once.

Percent of Clients Secluded: Percent of unique clients who were secluded at least once.

Restraint Hours: Number of hours clients spent in restraint for every 1000 inpatient hours.

Seclusion Hours: Number of hours clients spent in seclusion for every 1000 inpatient hours.

Active but no or few current participating facilities

Treatment of co-occurring substance abuse: Percent of clients diagnosed as having co-occurring psychiatric and substance disorders who are participating in treatment interventions for their substance disorders.

Child and Adolescent Functional Assessment Scale (CAFAS): Mean percent change between Admission and Discharge ratings of overall functioning using the Child and Adolescent Functional Assessment Scale (CAFAS).

Multnomah Community Ability Scale (MCAS): Mean percent change between Admission and Discharge rating of overall functioning using the Multnomah Community Ability Scale (MCAS).

Additional Measures, not selectable for reporting to the Joint Commission

Staff Injury Rate: Number of staff injury events that occurred for every 1000 inpatient days.

Inpatient Consumer Survey – Environment: Percent of clients at discharge or at annual review who respond positively to the Client Perception of the Facility Environment domain on the NRI/MHSIP Inpatient Consumer Survey. (4 questions)
